A controversy over the custody of little Effle has been pending before Judge Colley for some weeks. The parties to it are Mrs. D'Artney and Mrs. Holstrom. Hoaving of the case was set for Friday, and in the meantime Mrs. Holstrom retained the custody of the child. This afternoon Judge Coffey was called upon for an order commanding that little Rifie he immediately produced in court. Acting under this order an officer attached the child in the possession of Mrs. Fredericks Van Valkenberg. The woman was found with the child or her way to the ferry prepared to take passage to Fresu.

Durrant was centenced to be hearged a year ago last February, but has been granted several stays of execution punding the hearing of his appeal for a new trial by the supreme court. All this time to has been confined in the county jail, where he has maintained his usual solid composure, devoting his time to study and religious readings.

When Durrent was infarmed by the head jailer of the supreme court's decision, he burrent two surfaces and said this was a very cruel world. Its said this was a very cruel world. Its said that some day the truth would prevail and he would be vindicated. He seemed to take some comfort from the report that Chief Justice Bearty would in a few days fix a dissenting opinion. Durrant has ever since his arrest manifested the most supreme countdence in his ultimata acquittal, and when he was convicted in the supreme count would grant him a new trial.

The writer isno apologist for the vagaries and vices of Byron, neither does he plead for the reading by children of unprofitable descriptions found in "The Lady of the Lake." Don't set up a straw Byron and depict the Lodge "ortic" upon bended knees. Be fall the excess me for montioning something so unusual in the tactics of the Expositor.

A RIGHTEOUS DECISION.

The commission which has decided The commission which has decided that San Feder rather than Santa Monica is the proper place for the government to expend public moneys in the work of impraving a deep-water harbor, did a good thing. It not only selected a site for a barbor where overwhelming evidence shows that nature had done the most to make a barbor, but it care most to make a harbor, but it gave emphatic contradiction to the oft-reemphatic contradiction to the off-re-peated assertion that the railroad com-panies control legislation, and that the interests of the people are invariably trampled under foot at the beheat of the great corporation.

reat corporations.

The decision is in itself a very right-The decision is in teet in the to do you one, but it goes farther than to do justice upon a disputed point relative to the merits of San Pedro and Santa Monica harbors. Taken in connection with the defeat of the funding bill, it with the neighbor of the domonstrates conclusively that corpora-tion influence in this government is not supreme, but, to the contrary that when the will of the people has its oundation in truth and justice, tha ionnestion is the transport to expect its triumph over the most powerful corpor-ation that may come forward to dispute ite right to control.

The selection of San Pedro for a deep harbor is not a matter of very great consequence outside the city of Los Angeles and its environment, so far as material interests are directly affacted but as a just decision m with the popular will and again formity which may be proved the most attenuous efforts that could be put furth by one of the greatest and richest corporations in the United States, it is of deep and significant consequence, not only to all the people of California but of the people of republic. It serves notice upon the corporations that their cause must be a just and equitable one if they may hope to secure legislation in its laver; and it gives assurance to the people that their voice will not be to the people that their voice will her be lifted in vain against corporation greed if their demands are based upon a solid

foundation of justice.
It is a decision of an hundred fold more importance than many another which has represented material interests which surpass it many times.

Today the Republicans will meet in Totar the Republican will most in numicipal convention and nominate their ticket, and the issues will again have been made for another city cam-paign. These oit-recurring elections— city, county, state and national—have come to be looked upon by a majority of people as an unavoidable nuisance, and people at an univolded that the sentiment is not entirely without warrant. Parti-sanship carried to extremes too often takes the place of fair and honorable ent, and aptagonisms are create argument, and absquamment and by the purposes to be subserved in the matter of selecting suitable persons to transact public business. So far as the Rarun-Lican is concerned it hopes to see the ent campaign marked by less of parpresent campaign marked by less of parties and personal rancor than is too often the case, and in expressing this hope we know that public sentiment is voiced. It ought to be nessible to conduct local campaigns in such a manner that the average citizen will not view their recurrence with averagen and dis-

THE atturneys of Nancy Abbott, the San Francisco woman who was twice defeated in the courts in her attempt to detested in the content to be the wife of Millionaire Thomas L. Quackenbuch, now assert that their client will succeed securing the dead man's wealth, bs-tso the judgment sgainst the woman was not recorded by the county clerk prior to the death of Quackenbush, which occurred the day following that upon which judgment was rendered. The REPUBLICAN does not know m about the mysterious workings of the law, but if it is a fact that a judgment of court can be nullified for such a cause the law, to that extent, is a contemptible travesty upon justice and a bulwark of strength for fraud. The attorneys of of strongth for Irada.

the Abbett woman will probably find
that they are mistaken when they get
into court with their claim.

Let us give the devil his due. It is stated that Russel Sage recently loaned a poor brother in Illinois \$50 at 6 per cent interest—and be might have made it 10 per cent without violating the narry law. There is no use talking, herbiven, blood is thirker than water and no man is so mean that a white stroak cannot be found in his makeup. In all probability Russell Sage is taking serious chances in making that loan to his poor brother. The security may not be gilt-edged.

It begins to look as though the spirit of reform had so thoroughly permeated the inner consciousness of ex-Seaarth respectively and the original ordering of the goods.

It begins to look as though the spirit of reform had so thoroughly permeated the inner consciousness of ex-Senator Goucher that he will not very long be Goucher that he will have bouse of Fusion, but will be impelled to move on to that higher and better sphere where Populists hold exclusive sway. When the spirit of reform once takes posses-

sion of a politician there is no telling where it will carry him.

Ex-Sentros Goucher enthusiastically commends the Democratic city conven-tion. In view of the fact that the convention carried through his program without a treak it was suspected that he might do so. The ex-Senator has reason to feel elated over the confidence reposed in his leadership by the Amalgamated Brotherhood of Reform.

The Ring Mountains of the Moon.

The Ming Mountains of the Moon.

The moon is really and truly a great planet of mountains, its whole visible surface being dotted with elevations of curious shapes and of extraordinary height. We say "its whole visible sarface" and hasten to explain that we make this statement simply because the eye of man has never seen but one side of the sarface of the moon. What we see convinces us that the little planet is extremely impunitaines, for on the "end" exposed to our view there are no less than 80,000 peaks, varying in height from 2,000 feet to 4 miles. When we consider the fact that this lumarian world is early one thirty-second part as large as the earth we can easily see why it desarves the title of the "planet of great mountgains." There is a peculiar thing about these 30,000 moon peaks. Each and every one of them has a ringlike form, the open end of the conical point bring of greater or lesser diameter, according to the height of the mountain. In a low grade release, but when viewed through a high grade glass it is seen that the depression in the center of the queer "ring mountain" is often so great as to be below the general level of the surrounding country. The depth of these depression is calculated in a curious manuer—by figuring on the relative shadows they cast when the san is shining full upon them. The diameter of these "ring mountains" varies greatly, some of the larger ones being 50, 100 or even 150 miles, while the smaller look like post holes when viewed through a good tolescope.—St. Louis Republic.

The more he ordered the greater would be the waste and the better for his pocket, and of course there was a dreadful howl when, in 1841, Mr. McCulloch proposed a reform. The reform was indeed carried—on paper. But that, too, for a long time, proved to be little better than waste paper. The officials maturally entertained the strongest objection to rolluquishing their customary perquisites and held on to them until a few of them were prosecuted for theft, or, to adopt the more politically plusacology of a treasury minute, for the systematic misspropriation of public property," and then for the first time Mr. McCulloch's reform became a real one, and ever since all waste has been properly collected and systematically dealt with.—Chumbers' Journal.

Brethren, beloved brethren, is it not possible that some means may be adopted by which the local Democratic platform and Goucher may be reconciled? I am not talking through my hat darkly. The child and its we nurse should, if possible, bridge the yawning chasm between them. Listen to the low, uwest voice of the deadly parallel:

And so the fusion hen again is on the nost. She was on two yoars ago, and Populitio still are searching for the egg that she laid. She was on lest fall, and I know of nothing much that she laid unless it was the Populite party. She is on now; what will she lay? Indging from the past, I could forced the result, but I would again he denounced as a traitor and increase by the fusion gang, for doing so, until even middle-of-the-road Populiste (mon who feel procisely as I do) would begin to believe the olitoid tale, and I do not know that say-thing that I could do or eay is worth that smoont of powder. But, it will be said, the Populiste mon more of process or not to blams if the Democrate chose to name the samn nominees. Even so; but the pavements of Freeno have smoked with the hot treast of alleged Populists in search of "leading Democrate" with whom the fusion deal might be worked. I tell you, gentlemen, that if you forever make of your party a thing to be dragged in the dust at the hords of some alter party, you will teach men to look upon it with contempt. I you do not reasy in the dust at the hords of some cher party, you will teach men to look upon it with contempt. I you do not reasy input it belly and whine "ma, too," when a distribution of olitices us thand, you cannot expect that other men will respect it.

And what should you expect of this fusion child for which you have travalled? Listen: Two years ago the Democrate held out to the Popullets the pop of a monination for the recordership. Then a Democrat ran independently and—received the Democratic vote and the election. This year they rewarded that independent candidate by themselves nominating him for the same place. Does history repeat itself? Look about you and see. This year the Popullets have for a chief caudidate a nomines for city clerk. The Democrate, too, have named him—Look about you and see.

Ah, well! It is useless to write. The man who is born a lusionist must stay so till the end. Experience does not teach bim, and of course words will not. I sympathics with Captain George Duncan of Company C. He was not mustered into the service to light cows mostered into the service to light cows, and naturally does not wish to encounter them. What glory could be attained in meeting a bossy on the ensaguitaed field, any way? I do not blame him for refusing to accept the challenge, and I am sorry that he wrenched his back. A I cow should be tied when warriors are about.

The REPUBLICAN annuances that "Na poison Lycurgus Franz Bachman' is recovering from his recent injury. I am covering from his recent injury. I am since properly glad to hear it. At the same time, I feel that it is due to Mr. Bachman to correct the error into which this paper has fallen in naming him. His names, as given and inherited, are Necotoleous Lysimechus Freiligrath Bachman. The rest got away, I congratulate Neoptoleous on his recovery.

I picked this up on the street:

WILDFLOWER PARAGRAPHS. The Valley Road Petitioned for a

ing Growers.

The report of the ways and means The report of the ways and congress committee recommending to congress that the classification of Zants currants that the massingarion of Zants currents se changed and that the import duty on them be fixed at 1 cent a pound has aroused the business men and raisin growers of Freeno. The passage of the new tariff bill according to the reconnew tariff bill according to the recom-mendation of the committee would re-sult very injuriously to Chilfornia' agreat industry, and prompt and decisive ac-tion has been decided upon to avert, if possible and carries

ossible, such action. This afternoon at 3 o'clock the leading

tion has been decided upon to avert, if possible, such action.

This afternoon at 3 o'clock the leading growers and business som will hold a meeting at the Hughes botel, the purpose of which will be to take steps to make a fight against the unfair recommendation regarding the trecian currants. The plan is to take steps to make a fight against the unfair recommendation regarding the trecian currants. The plan is to send a delegation to Washington convince them of the error of the committee. For this it will be necessary to raise \$500 or \$5000 to \$6000 to defray the expenses of the delegation. This will be the chief subject to be considered at today's meeting. The local business men and growers will be appealed to for assistance, as well as the San Francisco people who have interests here. That the necessity for action is stront will not be the subject of any debate at the meeting, as everyone realizes what will result if the proposed teaching make in the israil on the day and the subject of the decider is made in the israil on the day at the meet. If anything is to be done to induce congress to reject the recommendation of the ways and means committee, it must be before the latter part of this month, when the now bill will come up for passage. It is thought that if a delegation could be sent immediately to the national capital there would be good ground for the hope that the congressmen could be made to see the fairness of the claims of raisin growers—that the daty be increased from 1 cent to 2½ cents, which figure the committee has recommended for the territor or mains and dried grape. The arguments in layer of the increase, and the important place the Greedan product holds in competiting with our raisins and dried grape. The segments in layer of the increase, and the important place the Greedan product holds in competiting with our raisins and fried grape. The segments in layer of the increase, and the important place the Greedan production of the Rugmanan to nead in the original products of the increase of th

will meet with every encouragement in that purposes. The outlook for reining and dried traits during the century senson appears to be very bright. By the time of the new grons the oastern markets will have practically hear cleared of last year's goods. Every one connected with the business in a commorcial way expresses possiblence in good prices. It was demonstrated to the growers last year what they can do by a determination to hold for each and resultant competition among the dealers, and it is believed that they have been encouraged to mexicult that they have been encouraged to mexicult that will make them seads aftern, if not litrain, during the coming season.

A petition to have the Valley road ustablish a station where its line crosses the Chicago Wildlower road, is buing virculated in this neighborhood. Many signatures have been obtained, and the petition is nearly ready for presentation. As the above location is best suited for the interests of the farmers living between Oleander and the Grant, and between Cleinder and the Grant, and between Cleinder and the Grant, and between Cleinder and the Grant, we trust that the directors of the Valley road will make the interests of their future patrons their interests.

A dence was held at the Chicago hall lest Friday night. A large crowd was present, and every one had a good time, especially the party or parties who stole the lunch that was to have been served during the evening. The committee on arrangements say that if the light-lingered gentry will return the empty pie plates and knives no questions will be asked.

Rabbit drives are getting to be a common occurrence in our neighborhood. Next Saturday, March 5th, at 10 a.m., a drive is to be held immediately south of Wildlower. The place of assembling will be atthe Dennison ranch, one mile sent of the Franklin school bones, the interescent of the McCall and Wildflower, Kingaburg roads. The longer care peets are very numerous, and it is the duty of every man, woman and child to help exterminate them. Let every one come to the drive who can.

Refer Wouldn't Have It.

A few days ago three ladies, who are imployed at the wourt house, thought they would go to court. Two of them are young ladies, while the third is married. She was to act chanarone to the younger ones, having been to court be fore, she said.

It was to luige Rieley that the tadles went to court, that is, they attended an insanity examination held before him. The ladies sat in the lirst row of the guestators' chairs, and were chewing lunge wale of gum. Presently Judge Rieley ordered that every one not connected with the examination be excluded from the court room. With wonderful slacrity the ladies tripped their way out. It is known that Judge Rieley averse to having any one chew gum in his presence, and it was undurally supposed that the ladies were ordered out for this reason. Hearing of this supposition, the kindhearted Judge went to the ladies and explained that he had not issued the order of ejectment because of their presence, but that of there.

The affair has been the subject of considerable anusement, and the following verse, which is supposed to lave emerced.

Grant on the Buttle of the Wilderne Grant on the lattle of the Wilderness.
The general in chief, Grant, talked for some time with officers of the staff about the results of the bettle of the previous days. He said in this connection: "All things in this world are relative. While we were negaged in the Wilderness I could not keep from thinking of the first light I ever saw—the Wilderness I could not keep from think-ing of the first fight I over saw—the batth of Pulo Alto. As I looked at the long line of battle, consisting of 5,000 men. I felt that General Taylor had such a fearful responsibility reating upon him that I wondered how he ever had the nerve to assume it, and when, after the light, the canadities were reported and the losses accordaned to be nearly 60 in killed, wounded and missing, the en-gagement assumed a magnitude in my eyes which was positively startling. When the news of the victory reached the States, the windows in every house-hold were illuminated, and it was the States, the windows in every house-hold were illuminated, and it was largely instrumented in making General Taylor president of the United States. Now, such an affair would rearely be deemed important enough to report to hendquarters." He little thought at that moment that the buttles then in progress would be chiefly instrumental in making the communiter himself pres-ident of the United States.—General Hornee Porter in Century.

The Chateau do Ramboulliet, which is now the favorite residence of the president of the leventh residence of the president of the leventh republic, has a listory remote from the literary fact of the eighteenth century which has made the word Ramboulliet significant of an upond of French culture. It was in this chateau that Francis I breathed his last and Charles X was deserted in his death. It is not generally known, however, how Louis XVI became its projector. Until 1785 Rambouillet belonged to the Due de Ponthievre, grandson of Louis XVI was Mue, de Montespan. Emis XVI wished very much to preseess it. This desire became a fixed passion, which was augmented by his dislike of its owner. But one day he declared, "The preseession of Rambouillet would be the happiness of my life." To which the duke graciously replicit. "God forhid that I should be the cause of your unhappiness. Sire, Hambouillet syours or your own terms." The price fixed was 11,000,000 frams, of which 0,000,000 the royal treasury.

MILITARY SCIENCE.

tomate Guas Are Modern Features.
It seems to be the general opinion among United States army officers that the development of military science in the immediate future will be in the direction of simplified fortifications, greater utilization of the bicycle and the ex-

rao immediate nutrate with a in the direction of simplified fortifications, greater utilization of the bicycle and the extended use of some form of automatic gam. The modern army engineer sees little use in raising great mounds of earth such as used to be done when hasty and even permanent works were needed. The bigger the earthwork the greater the mark for the enemy's gams. A hole in the ground has been the theoretical formula for fort building, and now that we passess fieldpieces with disappearing entringes it can be practically carried out. A gun that is capable of rising out of an innocent leaking out of sight, leaving hardly a trace of death dealing builds and then shaking out of sight, leaving hardly a trace of its presence and certainly nothing to fire and the successive of Napoleon.

The rille of the future will be the automatic rifle. This is the conclusion of military men not only of this, last of other countries. General Wille, a Gammurany expert on the subject of firemans, says decisively that it will ultimately be the rifle in general use by the armics of the world. Its particular point of merit is its capacity for doing away with the mechanical operation of leading. In offered those its own loading, I not feet it does its own loading, leaving the soldier free to attend to the business of firing, thus concentrating his ain surer.

infertion on his opponent and removing his aim surer.

As pointed out by General Wille, the force of the recoil of the automatic gon is outployed for changing and closing the breech, and the first has only to let off the shot in order again to load the wenpon, so that the manber of shots discharged without an effort is precisely the same as the total contents of the magazine. The only comparatively were next of the automatic gain lies in the same as the total contents of one magazine. The only comparatively weak part of the automatic gan thes in its springs, but, as they have been found after lests made in Austria to withstare, the wear and tear of from 10,000 to 14, 000 discharges, this does not count for much.—New York San.

ROYAL HUNT TOMFOOLERY. What It Costs to Maintain the Famou

What It Costs to Mahutai the Famore Sport.

A year or two ago, says the editor of London Truth, I teok up the master of the royal backhounds, for I have always thought that anything with less of the redeeming feature of sport than to cart a fana deer to some spot, burn it out, bunt it with dogs, and, having hunted it down, put it back in its cart for an other day's "sport" cannot well be conceived. When I was engaged in this crusale, I received many letters assuring me that the deer like being pursued by dogs, although how the animals conveyed thoir singular idea of pleasure to the writers of the letters was not explained to me. Now that the bishops have joined the crusade, we may loope that the crue tonfoelery of this royal hant will seen cases.

The country pays the costs. The salary of the master of the backhounds (21,200 ner animan) is always origord by a mobleman, the compant of the past changing with a change of ministers. Bestdes this there are scharies to huntsmon, whips and others, the purchase and leep of houses and hounds, etc. I should suppose that the total necessary it is defrayed, it is true, from the civil list. But when the amount moded to maintain the sovereign was investigated in order to arrive at the total necessary, this expenditure was included in the estimate.

It is suggested by the bishops that

It is suggested by the bishops that the quarry should couse to be deer and should henceforward be a red herring. But the idea, as an attributed ungiesty, of the sovereign keeping a lot of dogs to run after a red herring is childish.

Grant beiting the Home militia.

Grant left West Polnt in midsammer and spent his furlaugh in Bethel and Georgalown. He was invited by the officers of the militin to drill the troops at "general master," which took place at Basselswille during August of 1844.

William Wilson and Peter Wannas are two of the few witnesses living who remember the splendid occasion.

He impressed itself inoffaceably on young Wilson's mind because it seemed wooderfal, even revolutionary, to see a young lad such as Cack Grant looked, oxtering the pompous old officers about "He looked very young, very slender and very pade.

"He looked very young, very shouler and very pale.
"He was dressed in a long blue coat, with big opaulers and big brass buttons, and his trousers seemed to be white, though they may have been a light gray. He wore a cap and a red such around his waist, and ho rode his horse in fine style.
"I was perfleularly struck with his voice—that is, his way of using it. The old men tarked out their commands. You couldn't tell what they said. Noise seemed to be their idea of command, but Grant's voice was clear and calm and cut across the parado growned with great precision. It was rather high in pilet, but it was traited. I could tell that, though I was only a bog."—Hanlin Garland in McChre's Magnaine.

The Circle County,
The oldest shared county among th 3,000 which go to make up the separate divisions of the various states is Warren county, Tenn. It lies himnst exactly in county, Tenn. It lies almost exactly in the gengraphical center of the state mentioned and is about as near a perfect ofticle as any division of hand could possibly be. The circle would be perfect but for the fact that there is a short stretch of the northern boundary line which follows a small stream for a short distance. It is bounded by Cannon, DeKath, Coffee, Grandy, Van Buren and White counties and is in no way remarkable except in share.—St. Louis Republic.

The Suitan and Electricity.

The suitan seems to have a curious mingled liking for and a dread of electricity. Mr. Burght tells in Cassall's Magazine that some years ago be caused to be exceted in the grounds of Yhdiz kinsk a small theater lighted by incundescent lamps. One day he saw the workness tracking the walls in order to bury the wires leading from the eagins room to the theater and stopped the work, insisting that the wires should all be placed in sight on poles, as he feared that otherwise they might be used to produce an explosion. He had also an electrical boat on a small lake, an English dogent driven by electricity, and a tiny electrical transan, upholstered in blue satin and gold, which raus in a circle. It is said that he has never yot ventured inside any of these vehicles, and also that he has forstantinople lest markerous conspicate should be devised over the wires. hould be devised over the wires
